CAPABILITIES STATEMENT

-- Software Development – Health IT – Network Security – Software Testing --

KRM Associates, Inc. is a small, independent woman-owned company headquartered for 25 years in historic Shepherdstown, West Virginia. We provide information technology and security services and consulting, specializing in Healthcare Information Technology (HIT) and Information Technology (IT) security.

Our Value-Add for our Clients

- Our Talented, Versatile People
- Commitment to Open Source
- Agile Development Process
- True Focus on Client Needs
- Extensive Network of Partners and Consultants
- Long-term Stability

We have been applying industry best practices and creative vision to strategic management, technology assessment, project management, security and assessments, help-desk environments, risk analysis, technical system design and development, certification and accreditation support, and technology development for more than 20 years. KRM's principals have more than 60 years combined information technology and business experience and are accompanied by a staff of IT industry professionals. KRM strives to excel in customer satisfaction and to be a reliable source for IT services and solutions, and achieves those goals through performance and consistency. KRM's D&B Summary Performance Rating of 93 is indicative of the responsiveness and dependability that KRM offers its clients.

CORE CAPABILITIES

KRM's focus is on creative, effective solutions for business owners and users of technology in the areas of Healthcare, Network and Device Security, and Software Testing.

Modern Software Development

- Agile
- Continuous Integration
- DevOps
- Cloud-based

Health IT

- VistA (and derivatives) Development and Integration
- M/MUMPS Expertise
- Standards Development and Implementation Strategies
- Academic Engagement
- Clinical utilization of open-source health information technology

Network Security

- HIPAA Risk Assessments
- Network Vulnerability Scans

Software Testing

- Automated Quality Assurance Testing -- Selenium
- Manual testing / IV&V

MAJOR PROJECTS

Veterans Administration

- eHMP – Enterprise Health Management Platform initial core development and implementation. KRM subcontracted on a $162.5 million, 2 year contract.
- Image Viewer for eHMP – a zero-footprint image viewer application, allowing search and preview of diagnostic images and reports that can be launched through the eHMP. KRM provided integration services subcontracting on a 2 year, $3.6 million project.
- My HeatheVet Modernization – updating the code stack to improve performance and increase the ability to add functionality. KRM subcontracted on 2 separate 2 year projects worth more than $16.5 million.
- CRISP -- Continuous Readiness in Information Security Program. KRM provided database design and program implementation as a subcontractor for this 4 year, $300 million effort.
- NEBOSS (Network Engineering, Business and Operations Support Services) and NEDIIS (Network Engineering, Design, Implementation and Infrastructure Support). KRM provided senior engineering personnel as well as interns to support these two contracts as a subcontractor to multiple primes for more than 6 years at nearly $2 million per year.

Open-Source

- Helped establish Open Source Electronic Health Record Alliance (2011) – creating a community of interested users and supporters to improve and enhance VistA functionality
- ViViaN™ (Visualizing VistA and Namespace) – a tool for depicting the relationships of functions within VistA
- HealtheMe Health and Wellness Management System – an independent personal health record/patient portal that can consolidate standards-based medical information from a variety of sources.

Innovators in Healthcare Information Technology

MAJOR CLIENTS

KRM's knowledge-base, skill-set and longevity in the marketplace is supported by a diverse and comprehensive client base spanning state and federal governments, large and small commercial businesses, healthcare organizations, and academia.
